

Project 1 — LLM Response Evaluation

Role: AI Model Evaluator

Evaluated multiple AI-generated responses against structured quality criteria.

Work performed:

- Created evaluation prompts covering knowledge, reasoning, writing, and customer-service scenarios.
- Compared two or more AI responses to the same prompt.
- Scored responses for accuracy, relevance, completeness, clarity, reasoning, and instruction following.
- Identified unsupported claims and logical inconsistencies.
- Provided written explanations supporting each evaluation.
- Ranked responses from the strongest to the weakest.
- Developed examples of what an ideal response should contain.

Portfolio deliverable: LLM Response Evaluation Dataset and Scoring Rubric.

CORE SKILLS

AI & LLM Evaluation

- Generative AI Evaluation
- LLM Response Rating
- AI Output Quality Assessment
- Prompt Evaluation
- Prompt Engineering Fundamentals
- Hallucination Detection
- Human Feedback / RLHF Concepts
- AI Safety Evaluation
- AI Consistency Testing
- AI Model Comparison

Quality Assurance

- Test Case Design
- Test Scenarios
- Expected vs. Actual Results
- Defect Identification
- Bug Reporting
- Exploratory Testing
- Regression Testing
- Requirements Analysis
- Quality Auditing
- Root Cause Analysis

Data & Research

- Data Annotation
- Data Validation
- Factchecking
- Online Research
- Excel
- Google Sheets
- Basic SQL
- Basic JSON
- Basic Python
- API Testing Fundamentals

Tools

- ChatGPT
- Claude
- Gemini
- Jira
- Postman
- Microsoft Excel
- Google Sheets
- Google Workspace
